Summary

Israeli occupation forces (IOF) continued to commit crimes and multi-layered violations against Palestinian civilians and their properties, including raids into Palestinian cities that are characterized with excessive use of force, assault, abuse and attacks on civilians that are mostly conducted after midnight and in the early morning hours. This week, IOF repression against Palestinian worshipers in Bab al-'Amoud (Damascus Gate), which leads to al-Aqsa Mosque, was the most prominent event as dozens were wounded and arrested. Settler-attacks witnessed a rise this week too on Palestinian civilians and their properties across the West Bank, including occupied East Jerusalem. Also, this week, IOF closed the Gaza sea and banned fishing in violation of Palestinian fishermen's social and economic rights and their right to work as per Article 6 of the International Covenant on Economic, Social and Cultural Rights. PCHR documented 214 violations of international human rights law and international humanitarian law (IHL) by IOF and settlers in the oPt.

IOF shooting and violation of right to bodily integrity:

181 Palestinians sustained wounds, including 4 journalists and 3 children, as a result of IOF excessive use of force against civilians in the West Bank: 177, including 4 journalists, in the largest IOF repression campaigns against Palestinians in recent month, centered in Bab al-'Amoud are in occupied East Jerusalem. Dozens of others suffocated due to tear gas inhalation, and others were wounded in various IOF assaults on protests in solidarity with Jerusalemites across the West Bank.

In the Gaza Strip, a fisherman was wounded, and a fishing boat damaged in 5 IOF shootings on fishing boats in the Gaza sea. Also, Israeli warplanes launched several airstrikes in the Gaza Strip, 3 of them targeted agricultural lands in eastern Rafah and Khan Younis. Additionally, 5 IOF shootings were reported on agricultural lands and protests eastern Gaza.

IOF incursions and arrests of Palestinian civilians: IOF carried out 139 incursions into the West Bank, including occupied East Jerusalem. Those incursions included raids of civilian houses and shootings, enticing fear among civilians, and attacking many of them. During this week's incursions, 150 Palestinians were arrested, including 12 children, two journalists, a writer, and a paramedic. Most of the arrests and raids occurred during the clashes in occupied East Jerusalem, as 114 were arrested in the city.

In the Gaza Strip, IOF conducted a limited incursion into eastern Rafah and arrested 3 Palestinians, including 1 child, after they crossed the border fence. Two of them were later released.

Demolitions:

The occupation authorities ratified a decision to confiscate 147 dunums west of Bethlehem for settlement expansion purposes.

- Hebron: farmers and vehicles assaulted in eastern Yatta, and others assaulted in Haret Jaber

- Ramallah: assaults and roads blocked in eastern Umm Safa

Israeli closure policy and restrictions on freedom of movement:

On Monday, 26 April 2021, the Israeli occupation authorities closed the Gaza sea and banned all fishing or sailing activities in a manifestation of its collective punishment policy against Palestinian civilians in the Gaza Strip that directly denies fishermen their sources of livelihood.

The Gaza Strip still suffers the worst closure in the history of the Israeli occupation of the oPt as it has entered the 14th consecutive year, without any improvement to the movement of persons and goods, humanitarian conditions and bearing catastrophic consequences on all aspects of life. The United Nations confirmed that the Gaza conditions are worsening, with deteriorating health, power, and water services. The UN emphasized that the Gaza Strip requires immense efforts in the housing and education sectors and to create job opportunities.

Meanwhile, IOF continued to divide the West Bank into separate cantons with key roads blocked by the Israeli occupation since the Second Intifada and with temporary and permanent checkpoints, where civilian movement is restricted, and they are subject to arrest.

IV. Closure policy and restrictions on freedom of movement of persons and goods:

On Monday, 26 April 2021, Israeli authorities closed Gaza Sea completely and prevented fishermen from sailing and fishing. These Israeli measures are part of the Israeli collective punishment policy practiced against Palestinian civilians in the Gaza Strip that aims to harass fishermen and prevent them from sailing and fishing freely in areas where fish breed.

According to the Palestinian Centre for Human Rights (PCHR)'s follow-up, the Israeli Coordinator of Government Activities in the Territories (COGAT) declared the complete closure of Gaza Sea, starting from 06:00 on Monday until further notice. The Israeli Coordinator stated that, "This decision came in response to the launch of rockets towards Israeli settlements adjacent to the Gaza Strip."

This decision is part of Israel's policy of inhuman and illegal closure and collective punishment against the Gaza Strip. As a result, the livelihoods of 4,160 fishermen and 700 workers in professions associated with the fishing sector; the main providers for their families (a total of 27,700 persons) are threatened with further deterioration. Even before this decision, Gazan fishermen already suffered and were unable to fish and sail freely in the allowed fishing area due to the recurrent Israeli attacks at sea, the entry ban of equipment and necessary supplies for fishermen. Consequently, hundreds of fishermen are effectively unable to provide their families' basic needs, such as food, medicine, clothing, and education.

Furthermore, the impact of the new Israeli decisions would deepen the humanitarian and living crises in the Gaza Strip, especially raising unemployment, poverty, and food insecurity. Statistics pre-recent restrictions indicate a dangerous unemployment rate at 45%, i.e. 217,100 unemployed workers; this rate is highest among youth at 63%. Also, more than half of the Gaza Strip population suffers poverty, as data from the Palestinian Central Bureau of Statistics (PCBS) indicate that the prevalence of poverty among the Gaza Strip population exceeds 53%, and more than 62.2% of the Gaza population is classified as food insecure according to the United Nations Office for the Coordination of Humanitarian Affairs (OCHA).

The Gaza Strip still suffers the worst closure in the history of the Israeli occupation of the oPt as it has entered the 14th consecutive year, without any improvement to the movement of persons and goods, humanitarian conditions and bearing catastrophic consequences on all aspects of life.
